

## Bars, Night Clubs and Restaurants

Light Tape is similar to Neon. It is flat and produces a uniform light and gives an ultra modern twist to the more traditional form of decorative lighting solutions used in Night Clubs, Bars and Restaurants.

It offers versatility of application as it is not bulky and can be fitted just about anywhere providing the right kind of lighting to compliment whatever mood is required.

Light Tape is extremely safe in application and is becoming increasingly popular as the contemporary alternative to Neon on a variety of projects. It is a cost-effective environmentally friendly product that uses 85-90% less energy compared to other lighting technologies.
